A dedicated Frontend Developer with 4.5 years of experience specializing in React Native for mobile apps and React for web platforms. I work across the full product lifecycle, from UI/UX design and prototyping to development, testing, and deployment. Skilled in Git, CI/CD, and Agile practices, I build scalable, features that enhance user experience and business value. With a strong eye for design and proficiency in Figma and Adobe tools, I bridge the gap between design and engineering to deliver intuitive interfaces. Passionate about solving problems and creating meaningful digital experiences.

SKILLS

Programming language

- Javascript
- Typescript
- HTML, CSS
- SQL
- Swift
- Java/Kotlin

Framework/Libraries

- React Native
- React JS
- Next JS
- Node.js
- Redux
- React Query

Design/Development/testing

- Android Studio
- Xcode
- Maestro studio
- Postman
- Windsurf/VS Code/Cursor
- Figma/Adobe XD
- Notion

Database

- PostgreSQL
- MySQL
- Supabase
- Firebase

EDUCATION HISTORY

Bachelor of Information Technology

International Islamic University Malaysia (2017 - 2021)

Foundation in Engineering

CFS IIUM Petaling Jaya (2015 - 2017)

WORK EXPERIENCE

Mobile App developer @Paywatch Malaysia

February 2025 - until now

- I build and enhance key features such as health insurance, critical illness insurance, QR payments, and voucher systems. I work closely with UI/UX designers to translate designs into smooth, user-friendly components and ensure consistent performance across both iOS and Android platforms.
- I manage TestFlight and Firebase App Distribution for testing and releases, monitor Firebase logs during launches, and use Maestro to test app flows. I also assist in MoEngage analytics event setup and support CI/CD processes through Azure Pipeline to ensure efficient builds, deployments, and overall app stability.

Junior Mobile App developer @Zonar Malaysia

September 2023 - January 2025

- Specialize in React Native mobile development, using various libraries like Firebase, Redux, and React Navigation to build the mobile app. I'm also responsible for designing the UI/UX of the Zonar app, ensuring it's user-friendly and very well functional
- I work closely with my team across the full project lifecycle. Using insights from Google Analytics, we gather requirements, brainstorm ideas, and create designs in Figma. We follow Agile sprints with regular scrum meetings to track progress and solve challenges.

Junior Mobile App developer @Accenture

August 2022 - September 2023

- Maintain, enhance, and build new features for the Unifi mobile prepaid(TM) app using React Native, ensuring smooth performance and timely updates across all app stores. Integrate RESTful APIs, manage state with Redux, implement OneSignal for push notifications, and use Git for efficient version control and team collaboration.
