LinkedIn [linkedin.com/in/syedmhdarif](https://www.linkedin.com/in/syedmhdarif)

Frontend & Mobile Developer with 4.5+ years of end-to-end product experience — from UI/UX in Figma to CI/CD pipelines and store releases. Specializes in React Native and TypeScript for cross-platform iOS and Android, with secondary skills in Next.js, NestJS, and Supabase. Currently shipping fintech features at Paywatch Malaysia, with active focus on mobile security enhancement.

## SKILLS

### Programming language

- TypeScript
- JavaScript
- HTML / CSS
- SQL
- Swift (Basic)
- Kotlin (Basic)

### Framework/Libraries

- React Native
- React.js / Next.js
- Redux Toolkit
- TanStack Query
- NestJS / Node.js
- Tailwind / Three.js

### Design/Development/testing

- Azure DevOps
- CodeMagic / EAS
- Figma / Adobe XD
- Maestro / Postman
- Android Studio / Xcode
- MoEngage Analytics
- VS Code / Cursor

### Database

- PostgreSQL
- MySQL
- Supabase
- Firebase / MongoDB

## KEY PROJECTS

### Hikayat Daily · Play Store

LokalGig · lokalgig.my  
SajianLokal · RN + NestJS  
react-native-fast-crypto · OSS

## EDUCATION HISTORY

### Bachelor of Information Technology

International Islamic University Malaysia (2017 - 2021)

### Foundation in Engineering

CFS IIUM Petaling Jaya (2015 - 2017)

## WORK EXPERIENCE

### Senior Mobile Developer @Paywatch Malaysia

February 2025 - until now

- Architect and ship production fintech features — health & critical illness insurance flows, QR payments, and voucher redemption — serving thousands of users on iOS and Android. Collaborate closely with UI/UX designers to translate Figma designs into pixel-perfect, accessible React Native components with smooth 60fps animations.
- Own the full release lifecycle: TestFlight, Firebase App Distribution, Crashlytics monitoring, and Maestro Studio flow automation. Configure MoEngage analytics events for marketing and maintain Azure DevOps + CodeMagic CI/CD pipelines for iOS and Android builds, code-signing, and store deployment.

### Junior Mobile App developer @Zonar Malaysia

September 2023 - January 2025

- Led React Native development of the Zonar mobile app — owned core feature modules from authentication to real-time data sync using Firebase, Redux, and React Navigation across both iOS and Android.
- Owned full UI/UX responsibility, producing wireframes and high-fidelity prototypes in Figma validated by Google Analytics insights. Operated in Agile sprints with daily standups and fortnightly retrospectives, consistently shipping story points on schedule across a cross-functional team.

### Junior Mobile App developer @Accenture

August 2022 - September 2023

- Maintained and shipped features for the Unifi Mobile Prepaid (TM) app — one of Malaysia's largest telco consumer apps — ensuring zero-downtime rollouts across iOS and Android. Integrated RESTful APIs, managed state with Redux, implemented OneSignal push notifications, and practised disciplined Git branching workflows in a large enterprise team.
